Acoustic Test Bed in West Approach

to Sabin (Fourth) Lock

As shown on the attached chartlet, the large rocks, which were placed in the West Approach - North Canal of the Sabin (Fourth) Lock for the purpose of testing acoustic shoal detection equipment are still in place.

The top of the rocks may be up to four (4) feet above the existing bottom.

The rocks will be in place for the 2006 shipping season. Vessel operators are advised to use caution when navigating in this area.

DONALD P. LAUZON  
Lieutenant Colonel, U.S. Army  
District Engineer
